---

PROJECTS

1. Weather App

- Fetched real-time data using **JavaScript Fetch API** and OpenWeatherMap
- Dynamically updates temperature, humidity, and location based on user input
- Used **async/await** and **error handling** to manage API responses smoothly

2. Personal Portfolio Website

- Created using HTML, CSS, and JavaScript
- Showcases your skills, projects, and contact information
- Designed with a responsive layout and smooth UI interactions
- [Live Link: https://venkatesh-khatake.github.io/portfolio-using-js/]

3. E-commerce Website

- Built a product landing page using HTML/CSS with JavaScript-enhanced interactivity
- Implemented responsive design with Flexbox and Grid layout
- Added hover effects, product filter layout, and basic cart UI structure
